

Task assessment

- Full points will be given to teams who identified all the images (maximum of 5 images) within 6 min (timeout)
- Teams with similar image recognition score will be ranked based on timing.
- Rest of the teams will have a distribution of points.

Peer Evaluation

- Individual assessment component (20%)
- Confidential/anonymous
- Week 3 (5%)
- Mainly to assess contributions to design and planning phase
- Week 5 (15%)

Peer Evaluation

- Students who get a **PE2 score of less than 50% compared to the rest of the members** can have their final grade greatly reduced as compared to the rest of the team-mates.
- Important for each student to keep a record of his contribution to the team to assist our investigation in the event of issues raised from the team mates.
- Main aim is to prevent free-loaders in the team.

Briefings

- Week 1 (23th June): Course briefing (Dr. Smitha)@ recorded. Prof. Chin Ann will clear doubts
 - Algorithm
 - Raspberry Pi, image recognition and motor movement
 - Android
